for research, industry, education and leisure.

Newsletter 2020 #3

Web online Workshops

In these somewhat strange times, Shelyak's activity is at full speed. Unfortunately, several meetings were cancelled, due to the current crisis (Spectro Star Party OHP 2020, RCE, etc.), but the communication tools available make it possible to keep in contact with you - and this is essential! You will therefore find below proposals for interactive workshops to be held in the coming weeks. And if you have needs that are not fulfilled by these proposals, do not hesitate to suggest ideas for other workshops. You will also find the invitation to participate (online) to the ASW 2020 meeting - organized in the United States by AAVSO, in which we are strongly involved: a great opportunity to get in touch with the international community. I strongly encourage you to register.

Kind regards,

François Cochard, September 30 th 2020

Friday october 16th at 19H UTC

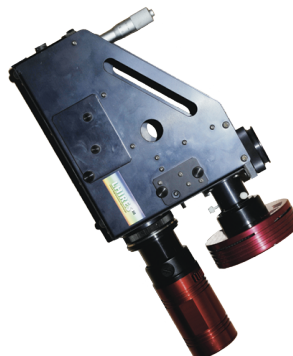

How to tune your LHIRES III ?

By François Cochard

Workshop in English only 

By François Cochard and Nicolas Durand

This practical workshop will cover all the settings of a Lhires III spectroscope. When doing spectroscopy, it is important to deeply understand the instrument, to fully understand the data it produces. This is a great opportunity to "open the box"... and explore the secrets of the Lhires III. Come with your questions!

Saturday October 17th at 19H UTC

Live observation with a LISA

By Olivier Garde

Workshop in English only 

Are you interested in spectroscopy, but you still have trouble understanding how to manage observation on the field ? So this workshop will show you a live observation in real conditions on the Olivier Garde setup. (Cancellation in case of bad weather).

Friday October 9th at 19H UTC

Live observation with a LISA

By Olivier Garde

Workshop in French only 

Are you interested in spectroscopy, but you still have trouble understanding how to manage observation on the field ? So this workshop will show you a live observation in real conditions on the Olivier Garde setup. (Cancellation in case of bad weather).

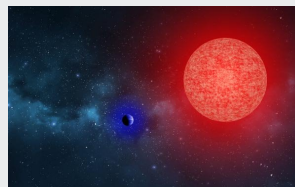

Saturday october 10th at 15H30 UTC

Spectro-photometry of exoplanets

By Jean-Christophe DALOUZY

Workshop in French only 

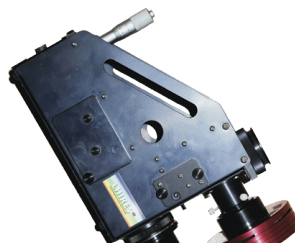

Jean-Christophe has made some very beautiful observations with a single Star Analyzer. He thus shows that beyond the equipment, this is the process that is important, and the methodology that accompanies it. A magnificent experimentation which shows how spectroscopy is full of potential.

How to tune your LHIRES III ?

By François Cochard

Workshop in French only 

This practical workshop will cover all the settings of a Lhires III spectroscope. When doing spectroscopy, it is important to deeply understand the instrument, to fully understand the data it produces. This is a great opportunity to "open the box"... and explore the secrets of the Lhires III. Come with your questions!

To register

All web online workshops are free.

When registering, please **indicate your e-mail** and not your name. (to give you the link to the video conference).

Caution, each conference is **limited to 100 people**.

On the following link, you can register for one or more workshops (**check the box of the workshop you want**).

A link is sent to each participant to follow the workshop taking place via the zoom video conferencing site. You can test your browser before the conference with the plug-in that will be downloaded automatically for your browser.

Register for workshops

October 31th, November 6th, 7th, and 8th, 2020

Online Spectroscopy workshop (ASW2020)

Workshop in English only 

In February 2019, we had the chance to participate actively at a magnificent meeting at the New Mexico (US), organized by Ken Hudson and Joe Daglen ([SMSW-2](#)). It was clear to all participants that this type of meeting had to be repeated regularly, and the 2020 edition was scheduled for November in Boston, thanks to AAVSO (American Association of Variable Star Observers). Current sanitary conditions prevented the meeting from being held as expected but we have decided to maintain this meeting in a « digital » format. It's a unique opportunity to participate in a nice worldwide meeting. It is also the best way to measure how much our discipline takes all its value when it is practiced internationally!

We'll talk about Science and Technique, and of course

we'll take about science and techniques, and of course beginners are welcome.

Four days of online spectroscopy workshop organised by the AAVSO.

Schedule of this workshop :
