

Astronomical spectroscopy  
for research, industry, education and leisure

## Newsletter 2019 #1

---

The whole team of Shelyak Instrument wish you  
a happy new year 2019.

Dear Friend,

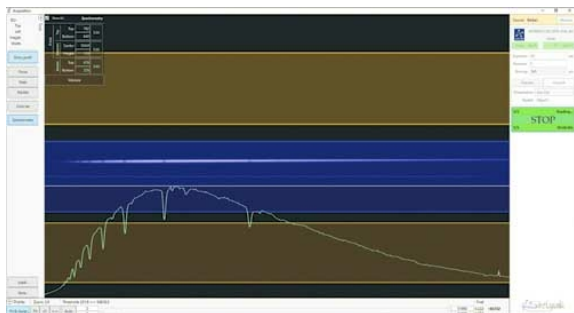

This is the first issue of the Shelyak Newsletter. We are very happy to share this information with you, and we hope it will be useful. More than 300 persons have already registered to this newsletter in few days (many thanks): it tells us that you expect a lot from Shelyak - GOOD !

2019 is starting very well, and we have several important projects on the way : we'll use this newsletter to inform you of any news. In the meantime, you'll find below what was made available during last months - spectroscopy is a fast moving activity, and we work everyday to make it easier and easier - with your help.

Please share this information around you!

Best regards,

François Cochard, General Manager

## Demetra

The software that just makes want to do spectroscopy.

You have an ALPY 600? Try Demetra software that will allow you to automatically manage observation from spectra acquisition to the calibrated final spectrum.

[Try it now](#)

## SPOX, remotely control your spectrograph

A new module made by Shelyak to remote control your spectrograph for the calibration and flat lamps

(Halogen and Ne/Ar lamp) for Alpy 600, LISA and LHIRES III.

[See the product](#)

## eShel upgrade

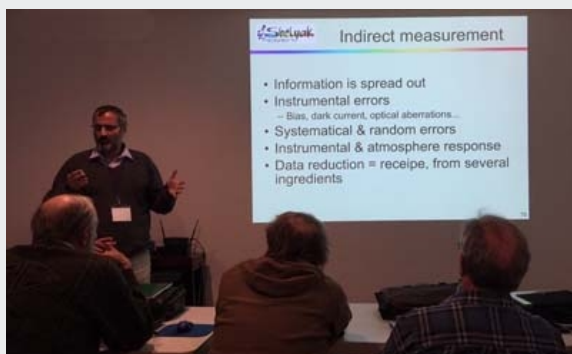

A new collimator lens to improve echelle spectrum in the blue end. Have more order (from #53 to #55), H delta line (4101,73 Å) is now accessible. A great upgrade for your eShel spectrograph !

# Training, conferences and workshops

Troughout **2019**, several training, conferences and workshops will take place. Here's the first 2 events :

February, 22 to 24th

Sacramento Mountains  
Spectroscopy Workshop

March, 15 to 17th

Technical meetings of Valbonne

The RTV (Rencontres Techniques de Valbonne) take place in south France

The second Sacramento Mountains Spectroscopy Workshop (SMSW-2) will be held in Las Cruces, New Mexico on **February 22, 23 and 24, 2019**.

All details, program, speakers and register are available on [the website](#).

near Nice. A theoretical and practical workshop on spectroscopy is proposed for beginners or persons wishing to progress in spectroscopy.

All details and registration [here](#).

Workshop in French only.

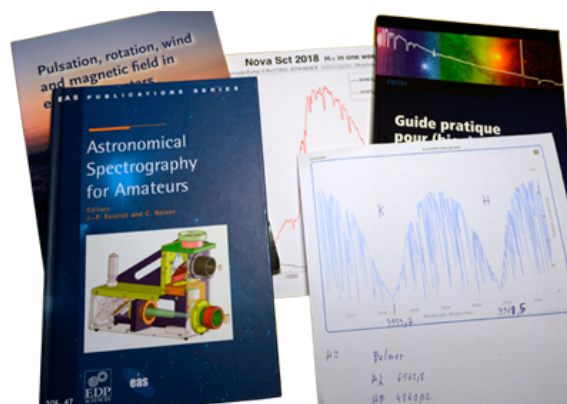

Our papers about spectroscopy  
Shelyak Instrument regularly carries out papers on spectroscopy, on the use of our instruments as well as reports of observations.
